### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 2, 4-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 3, "said sensor's earth scans away from ERGD areas on the earth" lacks antecedent basis.

Claim 2, line 3, "said sensors' scans" lacks antecedent basis.

Claim 4, line 2, "said satellite's ES scan transverses" lacks antecedent basis.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fallon or Lievre in view of Leung et al.

Fallon or Lievre discloses a system that have infrared earth sensors for determining satellite roll and pitch but is silent on the yaw biasing and the DIRA. However, Leung et al

teaches that yaw biasing or DIRA. However, Leung et al teaches that yaw biasing and DIRA are well known in the art.

It would have been obvious to one skilled in the art to have used yaw biasing or DIRA in Fallon or Lievre's system as taught by Leung et al to prevent the earth sensors for scanning spots (ERGD) that would interfere with the operation of the satellite.

### *Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Falbel, Fowell, Smay, Garg et al, Adsit et al, and Wirthman et al teach satellite control means.
